

Publications by Professor Eleuterio F Toro

Last updated on 13th April 2019

-----2019-----

[315] M. Petrella, S. A. Tokareva and Eleuterio F. Toro. *Uncertainty Quantification Methodology for Hyperbolic Systems with Application to Blood Flow in Arteries*. Journal of Computational Physics. Vol. 386, pp: 405-427, 2019.

<https://doi.org/10.1016/j.jcp.2019.02.013>

[314] Eleuterio F. Toro, Q. Zhang, B. Thornber, A. Scoz and C. Contarino. *A computational model for the dynamics of cerebrospinal fluid in the spinal subarachnoid space*. ASME Journal of Biomechanical Engineering. Vol. 141(1). January 2019.

doi: [10.1115/1.4041551](https://doi.org/10.1115/1.4041551).

[313] Eleuterio F. Toro. *The HLLC Riemann Solver: a Review*. Shock Waves. Under review, 2019.

[312] R. Demattè, V. A. Titarev, G. I. Montecinos and Eleuterio F. Toro. *ADER methods for hyperbolic equations with a time-reconstruction solver for the generalized Riemann problem. The scalar case*. Communications on Applied Mathematics and Computation. Submitted 2019.

-----2018-----

[311] Eleuterio F. Toro, F. Borgioli, Q. Zhang, C. Contarino, L. O. Müller and A. Bruno. *Inner-ear circulation in humans is disrupted by extracranial venous outflow strictures: implications for Meniere's disease*. Veins and Lymphatics. Volume 7:7156, 2018.

DOI: [10.4081/vl.2018.7156](https://doi.org/10.4081/vl.2018.7156)

[310] N. Agarwal, C. Contarino, L. Bertazzi, N. Limbucci, G. Rossi and Eleuterio F. Toro. *Intracranial fluid dynamics changes in idiopathic intracranial hypertension: pre and post lumbar puncture, medical and stent placement*. Current Neurovascular Research. Vol. 15, pp: 1-9, 2018.

doi: [10.2174/1567202615666180528113616](https://doi.org/10.2174/1567202615666180528113616).

[309] Christian Contarino and Eleuterio F. Toro. *A one-dimensional mathematical model of collecting lymphatics coupled with an electro-fluid-mechanical contraction model and valve dynamics*. Biomechanics and Modelling Mechanobiology. Vol. 17, No 6, pp:1687-1714. July 2018.

DOI: [10.1007/s10237-018-1050-7](https://doi.org/10.1007/s10237-018-1050-7)

[308] Angiolo Farina, Lorenzo Fusi, Andro Mikelic, Giuseppe Saccomandi, Adelia Sequeira and Eleuterio F. Toro. *Non-Newtonian Fluid Mechanics and Complex Flows*. Lecture Notes in Mathematics 2212. Springer 2018.

ISBN 978-3-319-74796-5

[307] Eleuterio F. Toro. *Lectures on hyperbolic equations and their numerical approximation*. In book: *Non-Newtonian Fluid Mechanics and Complex Flows*, pp: 91-169. *Lecture Notes in Mathematics*, Vol. 2212. Farina A, Mikelic A, Rosso F (Editors), Springer, 2018.

DOI: [10.1007/978-3-319-74796-5_3](https://doi.org/10.1007/978-3-319-74796-5_3)

[306] Francesca Bellamoli, Lucas O. Müller and Eleuterio F. Toro. *A numerical method for junctions in shallow-water channel networks*. *Applied Mathematics and Computation*. Vol. 337, pp: 190-213, 2018.

<https://doi.org/10.1016/j.amc.2018.05.034>

-----2017-----

[305] M. Strocchi, C. Contarino, Q. Zhang, R. Bonmassari and Eleuterio F. Toro. *A global mathematical model for the simulation of stenoses and bypass placement in the human arterial system*. *Journal of Applied Mathematics and Computation*. Vol. 300, pp: 21-39, 2017.

<https://doi.org/10.1016/j.amc.2016.11.028>

[304] Chiara Spiller, Eleuterio F. Toro, M. Elena Vázquez-Cendón and Christian Contarino. *On the Riemann problem for blood flow in human veins, including collapse*. *Journal of Applied Mathematics and Computation*. Vol. 303, pp: 178-189, 2017.

<https://doi.org/10.1016/j.amc.2017.01.024>

[303] Mirko Tessari, Andrea Ciorba, Lucas Omar Müller, Qinghui Zhang, Mariapaola Cristini, Erica Menegatti, Manuela Mazzoli, Stefano Pelucchi and Eleuterio F. Toro. *Jugular valve function and petrosal sinuses pressure. A computational model applied to sudden sensorineural hearing loss*. *Veins and Lymphatics*. Vol. 6:6707, pp: 44-49, 2017.

doi:10.4081/vl.2017.6707

[302] Laura Facchini, Alberto Bellin and Eleuterio F. Toro. *A time-dependent multi-layered mathematical model of filtration and solute exchange, the revised Starling principle and the Landis experiments*. *Veins and Lymphatics*. Vol. 6:6849, pp: 101-112, 2017.

DOI <https://doi.org/10.4081/vl.2017.6849>

[301] J. Cheng, Y. Jia, S. Jiang, Eleuterio F. Toro and Yu, M. *A Second-Order Cell-Centered Lagrangian Method for Two-Dimensional Elastic-Plastic Flows*. *Communications in Computational Physics*, Vol. 22(5), pp: 1224-1257, 2017.

doi:10.4208/cicp.OA-2016-0173

[300] S. Busto, J. L. Ferrín, Eleuterio F. Toro, M. E. Vázquez-Cendón. *A projection hybrid high order finite volume/finite element method for incompressible turbulent flows*. *Journal of Computational Physics*. Vol. 353, pp: 169-192, 2017.

DOI: [10.1016/j.jcp.2017.10.004](https://doi.org/10.1016/j.jcp.2017.10.004)

[299] A. Caiazzo, F. Caforio, G. I. Montecinos, L. O. Müller, P. J. Blanco and Eleuterio F. Toro. *Assessment of unscented reduced-order Kalman filter for parameter identification in one-dimensional blood flow models using experimental data*. International Journal for Numerical Methods in Biomedical Engineering. 2017; e2843; DOI [10.1002/cnm.2843](https://doi.org/10.1002/cnm.2843)

-----2016-----

[298] Eleuterio F. Toro. *Brain Venous Haemodynamics, Neurological Diseases and Mathematical Modelling. A Review*. Applied Mathematics and Computation. Vol. 272, pp: 542-579, 2016.
doi:[10.1016/j.amc.2015.06.066](https://doi.org/10.1016/j.amc.2015.06.066)

[297] L. O. Müller, Eleuterio F. Toro, E. M. Haacke and D. Utriainen. *Impact of CCSVI on cerebral haemodynamics: a mathematical study using MRI angiographic and flow data*. Phlebology, Vol. 31, No 5, pp: 305-324, 2016.
doi: [10.1177/0268355515586526](https://doi.org/10.1177/0268355515586526).

[296] Christian Contarino, Gino I. Montecinos, Raul Borsche, Jochen Kall and Eleuterio F. Toro. *Junction-Generalized Riemann Problem for Stiff Hyperbolic Balance Laws in Networks: an Implicit Solver and ADER Schemes*. Journal of Computational Physics. Vol. 315, pp: 409- 433, 2016.
<https://doi.org/10.1016/j.jcp.2016.03.049>

[295] Dinshaw S. Balsara, Gino Montecinos, and Eleuterio F. Toro. *Exploring Various Flux Vector Splittings for the Magnetohydrodynamic System*. Journal of Computational Physics, Vol. 311, pp: 1-21, 2016.
<https://doi.org/10.1016/j.jcp.2016.01.029>

[294] Laura Facchini, Alberto Bellin and Eleuterio F. Toro. *Modeling Loss of Microvascular Wall Homeostasis During Glycocalyx Deterioration and Hypertension that Impacts Plasma Filtration and Solute Exchange*. Current Neurovascular Research, Vol. 13, No 2, pp: 147- 155, 2016.
DOI: [10.2174/1567202613666160223121415](https://doi.org/10.2174/1567202613666160223121415)

[293] G. I. Montecinos, J. C. Lopez, R. Lecaros, J. Ortega and Eleuterio F. Toro. *An ADER-type scheme for a class of equations arising from the water-wave theory*. Computers and Fluids. Vol. 132, pp: 76-93, 2016.
<https://doi.org/10.1016/j.compfluid.2016.04.012>

[292] Davide Vanzo, Annunziato Siviglia and Eleuterio F. Toro. *Pollutant transport by shallow water equations on unstructured meshes: hyperbolization of the model and numerical solution via a novel flux splitting scheme*. Journal of Computational Physics. Vol. 321, pp: 1-20, 15 September 2016.
DOI: [10.1016/j.jcp.2016.05.023](https://doi.org/10.1016/j.jcp.2016.05.023)

[291] Svetlana Tokareva and Eleuterio F. Toro. *A flux vector splitting method for the Baer-Nunziato equations of compressible two-phase flow*. Journal of Computational Physics. Vol. 323, pp: 45-74, 2016.

DOI: [10.1007/978-3-319-57394-6_14](https://doi.org/10.1007/978-3-319-57394-6_14)

[290] Saray Bustos, M. Elena Vázquez-Cendón and Eleuterio F. Toro. *Design and analysis of ADER- type schemes for model advection-diffusion-reaction equations*. Journal of Computational Physics. Vol. 327, pp: 553-575, 2016.

<https://doi.org/10.1016/j.jcp.2016.09.043>

[289] Eleuterio F. Toro. *The Riemann Problem: Solvers and Numerical Fluxes*. Handbook of Numerical Analysis Volume 17. Handbook of Numerical Methods for Hyperbolic Problems. Basic and Fundamental Issues. Chapter 2, pages 19-54. Remi Abgrall and Chi-Wang Shu (Editors), Elsevier, 2016.

DOI: [10.1016/bs.hna.2016.09.015](https://doi.org/10.1016/bs.hna.2016.09.015)

-----2015-----

[288] Eleuterio F. Toro, Cristóbal Castro and Bok Jick Lee. *A novel numerical flux for the 3D Euler equations with general equation of state*. Journal of Computational Physics. Vol. 303, pp: 80-94, 2015.

DOI: [10.1016/j.jcp.2015.09.037](https://doi.org/10.1016/j.jcp.2015.09.037)

[287] Eleuterio F. Toro and Gino I. Montecinos. *Implicit, semi-analytical solution of the generalized Riemann problem for stiff hyperbolic balance laws*. Journal of Computational Physics. Vol. 303, pp: 146-172, 2015.

DOI: [10.1016/j.jcp.2015.09.039](https://doi.org/10.1016/j.jcp.2015.09.039)

[286] Eleuterio F. Toro, Lucas O. Müller, Mariapaola Cristini, Erica Menegatti and Paolo Zamboni. *Impact of Jugular Vein Valve Function on Cerebral Venous Haemodynamics*. Current Neurovascular Research. Vol. 12, No. 4, pp: 384-397, 2015.

DOI: [10.2174/1567202612666150807112357](https://doi.org/10.2174/1567202612666150807112357)

[285] Jun-Bo Cheng, Eleuterio F. Toro, Song Jiang, Ming Yu. *A second-order cell-centered Lagrangian scheme for one-dimensional elastic-plastic problems*. Computers and Fluids. Vol. 122, pp: 136-152, 2015.

DOI: [10.1016/j.compfluid.2015.08.029](https://doi.org/10.1016/j.compfluid.2015.08.029)

[284] Francesco Sisini, Eleuterio F. Toro, Mauro Gambaccini and Paolo Zamboni. *The oscillating component of the internal jugular vein flow: the overlooked element of the cerebral circulation*. Behavioural Neurology. Special Issue on: Blood and Fluid Circulation of the Brain: The Neurovascular Component of Neurodegeneration. Vol. 2015, Article ID 170756, 9 pages, 2015.

doi: [10.1155/2015/170756](https://doi.org/10.1155/2015/170756)

-----2014-----

[283] Eleuterio F. Toro and Gino I. Montecinos. *Advection-diffusion-reaction equations: hyperbolisation and high-order ADER discretizations*. SIAM Journal of Scientific Computing. Vol. 36, No. 5, pp: A2423-A2457, 2014.

<https://doi.org/10.1137/130937469>

[282] Gino I. Montecinos, Lucas O. Müller and Eleuterio F. Toro. *Hyperbolic reformulation of a 1D viscoelastic blood flow model and ADER finite volume schemes*. Journal of Computational Physics. Vol. 266, pp: 101123, 1 June, 2014.

<https://doi.org/10.1016/j.jcp.2014.02.013>

[281] Lucas O. Müller and Eleuterio F. Toro. *Enhanced global mathematical model for studying cerebral venous blood flow*. Journal of Biomechanics. Vol. 47, Issue 13, 17 October 2014, pp: 3361-3372.

<https://doi.org/10.1016/j.jbiomech.2014.08.005>

Also published as Pre-print. Isaac Newton Institute for Mathematical Sciences, University of Cambridge, UK. <http://www.newton.ac.uk/preprints2014.html>

[280] Lucas O. Müller and Eleuterio F. Toro. *A global multi-scale model for the human circulation with emphasis on the venous system*. International Journal for Numerical Methods in Biomedical Engineering. Vol. 30, Issue 7, pp: 681-725, July 2014.

DOI:[10.1002/cnm.2622](https://doi.org/10.1002/cnm.2622)

[279] Laura Facchini, Alberto Bellin and Eleuterio F. Toro. *A model for filtration and macromolecule transport across capillary walls*. Microvascular Research. Vol. 94, pp: 52-63, 2014.

DOI:[10.1016/j.mvr.2014.05.001](https://doi.org/10.1016/j.mvr.2014.05.001)

[278] Alfonso Caiazzo, Gino I. Montecinos, Lucas O. Müller, E. Mark Haacke and Eleuterio F. Toro. *Computational Haemodynamics in Stenotic Internal Jugular Veins*. Journal of Mathematical Biology. Vol. 7, No 4, pp: 745-72, 2015.

doi: [10.1007/s00285-014-0778-7](https://doi.org/10.1007/s00285-014-0778-7).

Also published on line as pre-print: WIAS Institute, Berlin, Germany. <http://www.wias-berlin.de/publications/wias-publ/run>

[277] Arturo Hidalgo, Lourdes Tello and Eleuterio F. Toro. *Numerical and analytical study of an atherosclerosis inflammatory disease model*. Journal of Mathematical Biology. Vol. 68, pp: 1785-1814, 2014.

DOI [10.1007/s00285-013-0688-0](https://doi.org/10.1007/s00285-013-0688-0).

[276] Cristóbal E. Castro and Eleuterio F. Toro. *Roe-type Riemann solver for general hyperbolic systems*. International Journal for Numerical Methods in Fluids. Vol. 75, No 7, pp: 467-486, July 2014.

DOI: [10.1002/flid.3903](https://doi.org/10.1002/flid.3903).

[275] Gino I. Montecinos and Eleuterio F. Toro. *Reformulations for general advection-diffusion-reaction equations and locally implicit ADER schemes*. Journal of Computational Physics. Vol. 275, 15 October, pp: 415-442, 2014.
<https://doi.org/10.1016/j.jcp.2014.06.018>

[274] E. Han, G. Warneche, Eleuterio F. Toro and A. Siviglia. *On Riemann solutions to weakly hyperbolic systems: Part 1. Modelling subcritical flows in arteries* (Submitted).

Also published as Pre-print. Isaac Newton Institute for Mathematical Sciences, University of Cambridge, UK. NPA-NI15003
<https://www.newton.ac.uk/science/publications/preprints>

[273] E. Han, G. Warneche, Eleuterio F. Toro and A. Siviglia A. *On Riemann solutions to weakly hyperbolic systems: Part 2. Modelling supercritical flows in arteries*. Submitted.

Also published as Pre-print. Isaac Newton Institute for Mathematical Sciences, University of Cambridge, UK. NPA-NI15004
<https://www.newton.ac.uk/science/publications/preprints>

-----2013-----

[272] Lucas O. Müller and Eleuterio F. Toro. *Well-balanced high-order solver for blood flow in networks of vessels with variable properties*. International Journal for Numerical Methods in Biomedical Engineering. Vol. 29, pp: 1388-1411, 2013.
DOI: [10.1002/cnm.2580](https://doi.org/10.1002/cnm.2580)

[271] Lucas O. Müller, Carlos Parés, Eleuterio F. Toro. *Well-balanced high-order numerical schemes for one-dimensional blood flow in vessels with varying mechanical properties*. Journal of Computational Physics. Vol. 242, pp: 53-85, 2013.
<https://doi.org/10.1016/j.jcp.2013.01.050>

[270] Eleuterio F. Toro and A. Siviglia. *Flow in collapsible tubes with discontinuous mechanical properties: mathematical model and exact solutions*. Communications in Computational Physics. Vol. 13, Number 2, pp: 361-385, Feb. 2013.
DOI: [10.4208/cicp.210611.240212a](https://doi.org/10.4208/cicp.210611.240212a)

[269] Bok Jik Lee, Eleuterio F. Toro, Cristóbal E. Castro and Nikos Nikiforakis. *Adaptive Osher-type scheme for the Euler equations with highly nonlinear equations of state*. Journal of Computational Physics. Vol. 246, pp: 165-183, August 2013.
<https://doi.org/10.1016/j.jcp.2013.03.046>

[268] Jun-Bo Cheng, Eleuterio F. Toro, Song Jiang and Wei-Jun Tang. *A sub-cell WENO reconstruction method for spatial derivatives in the ADER scheme*. Journal of Computational Physics. Vol. 251, pp: 53-80, 15 October 2013.
DOI: [10.1016/j.jcp.2013.05.034](https://doi.org/10.1016/j.jcp.2013.05.034)

[267] Annunziato Siviglia, Guglielmo Stecca, Davide Vanzo, Guido Zolezzi, Eleuterio F. Toro and Marco Tubino. *Numerical modelling of two-dimensional morphodynamics with applications to river bars and bifurcations*. Advances in Water Resources. Volume 52, pp: 243-260, 2013.

<https://doi.org/10.1016/j.advwatres.2012.11.010>

[266] Riadh Ata, Sara Pavan, Sofiane Khelladi and Eleuterio F. Toro. *A Weighted Average Flux (WAF) scheme applied to shallow water equations for real-life applications*. Advances in Water Resources. Vol. 62, pp:155-172, 2013.

<https://doi.org/10.1016/j.advwatres.2013.09.019>

[265] E F Toro. The Riemann problem in computational science. *Numerical Methods for Hyperbolic Equations: Theory and Applications. An international conference to honour Professor E. F. Toro*. M. E. Vázquez-Cendón, A. Hidalgo, P. García-Navarro and L. Cea (editors). Pages 87-106. CRC Press, Taylor-Francis Group.

ISBN 978-0-415-62150-2, 2013.

[264] L Facchini, A Bellin and E F Toro. *A simple model of filtration and macromolecule transport through microvascular walls*. Numerical Methods for Hyperbolic Equations: Theory and Applications. An international conference to honour Professor E. F. Toro. M. E. Vázquez-Cendón, A. Hidalgo, P. García-Navarro and L. Cea (editors), pp: 339-346. CRC Press, Taylor-Francis Group,

ISBN 978-0-415-62150-2, 2013.

[263] L O Müller, G I Montecinos and E F Toro. *Some issues in modelling venous haemodynamics*. Numerical Methods for Hyperbolic Equations: Theory and Applications. An international conference to honour Professor E. F. Toro. M. E. Vázquez-Cendón, A. Hidalgo, P. García-Navarro and L. Cea (editors), pp: 347-354. CRC Press, Taylor-Francis Group.

ISBN 978-0-415-62150-2, 2013.

[262] M. E. Vázquez-Cendón. A framework for flux-vector splitting schemes. Numerical Methods for Hyperbolic Equations: Theory and Applications. An international conference to honour Professor E. F. Toro. M. E. Vázquez-Cendón, A. Hidalgo, P. García-Navarro and L. Cea (editors). Pages 379-387. CRC Press, Taylor-Francis Group.

ISBN 978-0-415-62150-2, 2013.

-----2012-----

[261] G. I. Montecinos and Eleuterio F. Toro. Solver for the Generalized Riemann Problem for Balance Laws with Stiff Source Terms: the Scalar Case. Hyperbolic Problems. Theory, Numerics and Applications. Tatsien Li and Song Jian (Editors). Vol. 2, pp: 576-583. Higher Education Press. 2012.

DOI: [10.1142/9789814417099_0059](https://doi.org/10.1142/9789814417099_0059)

[260] G Stecca, Eleuterio F. Toro and A Siviglia. *A finite volume upwind-biased centred scheme for hyperbolic systems of conservation laws. Applications to shallow water equations*. Communications in Computational Physics. Vol. 12, No. 4, pp. 1183-1214, 2013.

DOI: [10.4208/cicp.180511.071211a](https://doi.org/10.4208/cicp.180511.071211a)

[259] Eleuterio F. Toro and M. E. Vázquez-Cendón. *Flux splitting schemes for the Euler equations*. Computers and Fluids. Vol. 70, pp: 1-12, 2012.

<https://doi.org/10.1016/j.compfluid.2012.08.023>

[258] G. I. Montecinos, C. E. Castro, M. Dumbser and Eleuterio F. Toro. *Comparison of solvers for the generalized Riemann problem for hyperbolic systems with source terms*. Journal of Computational Physics. Vol. 231, pp: 6472-6494, 2012.

DOI: <http://dx.doi.org/10.1016/j.jcp.2012.06.011>

[257] C. E. Castro, Eleuterio F. Toro and M. Käser. *ADER scheme on unstructured meshes for shallow water: simulation of tsunami waves*. Geophysics Journal International. Vol. 189, pp:1505-1520, 2012.

doi: [10.1111/j.1365-246X.2012.05471.x](https://doi.org/10.1111/j.1365-246X.2012.05471.x)

[256] C. E. Zambra, M. Dumbser, Eleuterio F. Toro and N. O. Moraga. *A novel numerical method of high order accuracy for flow in unsaturated porous media*. International Journal for Numerical Methods in Engineering. Vol. 89, No 2, pp: 227–240, 2012.

<https://doi.org/10.1002/nme.3241>

[255] V. Casulli, M. Dumbser and Eleuterio F. Toro. *Semi-implicit numerical modelling of axially symmetric flows in compliant arterial systems*. International Journal for Numerical Methods in Biomedical Engineering. Volume 28, Issue 2, pp: 257-272, 2012.

DOI: [10.1002/cnm.1464](https://doi.org/10.1002/cnm.1464).

-----2011-----

[254] Eleuterio F. Toro. *High-order accuracy: monotonicity and non-linear methods*. Lecture Notes on Numerical Methods for Hyperbolic Equations: Short Course Book. Elena Vázquez-Cendón (Editor), pp: 53-83. CRC Press, Taylor and Francis Group, 2011.

[253] Eleuterio F. Toro and A Siviglia. *Simplified blood flow model with discontinuous vessel properties: analysis and exact solutions*. Modelling Physiological Flows, pp:19-39. Editors: D. Ambrosi, A. Quarteroni and G. Rozza. Springer-Verlag, 2011.

ISBN [978-88-470-1934-8](https://doi.org/10.1007/978-88-470-1934-8).

[252] Alberto Canestrelli and Eleuterio F. Toro. *Restoration of the contact surface in FORCE-type centred schemes I: homogeneous two-dimensional shallow water equations*. Advances in Water Resources. Volume 47, pp: 88-99, 2012.

[251] Alberto Canestrelli and Eleuterio F. Toro. *Restoration of the contact surface in FORCE-type centred schemes II: non-conservative one- and two-layer two-dimensional shallow water equations*. Advances in Water Resources. Volume 47, pp: 76-87, 2012.

[250] Carlos E. Zambra, Michael Dumbser, Eleuterio F. Toro, Nelson Moraga. *Finite Volume Schemes of High Order of Accuracy in Time and Space for Flows in Unsaturated Porous Media*. International Journal for Numerical Methods in Engineering. Vol. 89, Issue 2, pp: 227-240, 2012.
